

TRACK & TRACE

YOUR LINK TO A STRONGER SUPPLY CHAIN

A white label production floor software and service that customizes your software to bring unique codes to specific items and giving you complete transparency. As your market expands, you are able to accurately identify any product, any time, anywhere in the world.

PRODUCT IDEATION

A powerful set of production floor software and services. An end-to-end solution that uses data to apply a unique code to individual items in the production environment and then expands to capture much-needed supply chain information giving you the manufacturer total transparency. AMI is technology-agnostic, able to seamlessly connect all of your equipment as well as the world's largest leading ERP systems, including SAP. Elevate the intelligence of your pallet labeling and inventory on track.

- Automate with serialization and aggregation
- Streamline the conversion path for your customers
- Connectivity with other business applications
- Acquire peace of mind
- Protect your brand

RAISING THE BARCODE

AMI's Track and Trace solution helps to protect your brand you worked so hard to build and powerfully address specific threats to it including counterfeiting, diversion, and product recalls.

- Connectivity solutions for nearly any material or production environment
- Scalable from a single production line to a multi-facility/multi-line structure while still utilizing the original investment when achieving growth
- Codes can be formulated in a multitude of ways to best fit the brand, and data can be incorporated into existing enterprise systems or hosted by AMI.

Am I Getting Smart, Safe
Automation Solutions?
I AM, WITH AMI.
